Everyday Materials

Wood

We can make **tables, chairs** and some **toys** from wood because it is **hard**. It can be **rough** or **smooth**.

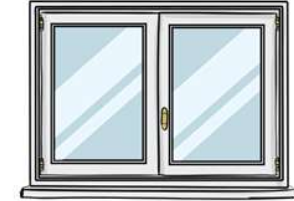

Metal

We can make **cars, spoons** and some **musical instruments** from metal because it is **hard** and **smooth**. You can't see through it.

Glass

We can make **windows, mirrors** and **glasses** from glass because it is **hard** and you can see through it. It is very **fragile**.

Plastic

We can make **toys** and **food packaging** from **plastic** because it is **smooth** and **strong**. It can be **hard** or **bendy**.

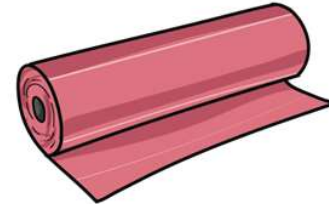

Rock

We can make **tiles** and some **jewellery** from **rock** because it can be **hard**. Some rock can also be **fragile**.

Fabric

We can make **clothes** and **bedding** from **fabric** because it is **soft**. It is usually **smooth**.

heavy – difficult to lift
light – easy to lift

rough – an uneven surface

smooth – an even surface

float – when an object stays on the top of the water

sink – when an object falls to the bottom of the water

There are lots of different **types of materials** and they are all good for making different things because they have different **properties**
